## 1: sublime下载安装

https://www.sublimetext.com/3

## 2:安装插件Package Control(注意版本问题 2/3)

crt1+`调出shell,粘贴下列代码:

import urllib.request,os,hashlib; h = '6f4c264a24d933ce70df5dedcf1dcaee' + 'ebe013ee18cced0ef93d5f746d80ef60'; pf = 'Package Control.sublime-package'; ipp = sublime.installed\_packages\_path(); urllib.request.install\_opener( urllib.request.build\_opener( urllib.request.ProxyHandler()) ); by = urllib.request.urlopen( 'http://packagecontrol.io/' + pf.replace(' ', '%20')).read(); dh = hashlib.sha256(by).hexdigest(); print('Error validating download (got %s instead of %s), please try manual install' % (dh, h)) if dh != h else open(os.path.join( ipp, pf), 'wb' ).write(by)

## 3:退出重启sublime

在菜单->preferences->Package Settings和package control选项,就说明安装package control成功了

4:crtl+shift+p: 输入install,分别安装以下插件(存在无法下载错误)

AutoPep8, BracketHighligter, Trailing Spaces,

ConvertToUTF8, Anaconda, SFTP, AutoFileName, FileDiffs,

IMESupport , SublimeCodeIntel

5:修改Preferences-->插件-->Settings-User,添加对应的设置,可以直接使用我的设置或进行修改(需要对其python路径做修改,详情见附件sublimePluginsSettings)

6:在windows下进行文件共享,使用SFTP插件
